NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS – Page 1

FOR THE SIX MONTHS ENDED MARCH 31, 2022 AND 2021

(Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Discovery Harbour Resources Corp. (the “Company”) was incorporated under the Business Corporations Act of British Columbia on March 11, 2009. The Company completed a reverse takeover transaction with CVC Cayman Ventures Corp. on April 2, 2013. The Company is listed on the TSX Venture Exchange as a Tier 2 Venture Issuer having the symbol DHR-V.

The address of the Company’s corporate office and principal place of business is Suite 250 - 750 West Pender Street, Vancouver, British Columbia, Canada.

The Company has not generated revenue from operations since inception. The Company has accumulated losses of \$21,919,175 since inception and expects to incur further losses in the development of its business, all of which may cast significant doubt about the Company’s ability to continue as a going concern. The Company’s ability to continue as a going concern is dependent upon its ability to raise financing and generate future profitable operations. As the Company is in the exploration stage, the recoverability of costs incurred to date on exploration properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties. The Company will periodically have to raise funds to continue operations, and although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

These condensed consolidated interim financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in these condensed consolidated interim financial statements. Such adjustments could be material.

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, have adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company’s business or results of operations at this time.

2. BASIS OF PREPARATION

Statement of Compliance

These condensed consolidated interim financial statements for the period ended March 31, 2022 have been prepared in accordance with IAS 34 Interim Financial Reporting. They do not include all disclosures that would otherwise be required in a complete set of financial statements and should be read in conjunction with the Company’s 2021 annual financial statements which have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

The condensed consolidated interim financial statements were authorized for issue by the Board of Directors on May 26, 2022.

On December 14, 2020, Metalla Royalty & Streaming Ltd. acquired Genesis Gold Corporation with no change to the option agreement. The Company may earn its interest in the Property by making the following optional payments:

<u>Advance Minimum Royalty</u>	<u>US\$</u>

During the term of the option, the Company shall pay rentals for the unpatented mining claims to the Bureau of Land Management sufficient to keep the properties in good standing. Should the Company decide to terminate the option on any part of the Property on or after 15 June of any year, the Company will be responsible for making rental payments in that year.

The Company shall issue to the Vendor 166,667 share purchase warrants exercisable at \$0.15 per share for a term of three years (issued June 12, 2017 with a fair value of \$13,290).

The Company classifies its fair value measurements in accordance with an established hierarchy that prioritizes the inputs in valuation techniques used to measure fair value as follows:

- Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 - Inputs for the asset or liability that are not based on observable market data.

The following table sets forth the Company's financial assets measured at fair value on a recurring basis by level within the fair value hierarchy as follows:

As at March 31, 2022	Level 1 \$	Level 2 \$	Level 3 \$	Total \$

11. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, investment fluctuations, and commodity and equity prices. Market conditions will cause fluctuations in the fair values of financial assets classified as held-for-trading, available-for-sale and cause fluctuations in the fair value of future cash flows for assets or liabilities classified as held-to-maturity, loans or receivables and other financial liabilities. The Company is not exposed to significant interest rate risk as the Company has no publicly traded debt and no debt that bears variable interest. The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in gold and metal prices. Management closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in the foreign currency exchange rates. The Company's functional currency is the Canadian dollar. The Company is exposed to foreign exchange risk because the Company's financial instruments are denominated in both Canadian dollars and US dollars, and all current exploration occurs within the United States.
